

IAEP Working for YOU!

Strength in Numbers

The IAEP represents thousands of EMS professionals across the country, including thousands of AMR employees in California, Ohio, Washington, and more. By joining your voices with the IAEP's current members you're making a powerful move to improve the industry and the lives of EMS professionals with AMR country-wide.

Proven Resources

Members of the IAEP have access to the union's staff of top-notch attorneys, full-time lobbyists and negotiators, and staff that help our locals with communications, printing/mailings, and much more. The IAEP has the resources to fight for our members in the workplace and beyond.

EMS for EMS

All of the IAEP's national representatives are EMS professionals. They work within the industry and understand the specifics of the profession and the issues you face every day. That means you will receive the specialized service you deserve.

Power to Improve the Industry

Through lobbying efforts at both the local and federal level, the IAEP remains committed to improving the industry as a whole. Whether it's fighting to protect EMS from takeovers in Florida, or working with the EMS Labor Alliance on projects such as the National EMS White Paper, the IAEP is dedicated to improving EMS and working to ensure that you receive the recognition and respect you deserve as skilled life-saving professionals.

Member Benefits

Through the Union Plus benefits program our members have access to hundreds of special benefits. From financial aid to discounts on rental cars, our members enjoy benefits only available through IAEP membership. Through NAGE/IAEP Charities, the IAEP has also helped support our locals in charitable fundraising efforts, to assist members during hardships and to support worthy causes such as the EMS Memorial Fund.

Voting to join the IAEP is a vote for dignity and respect in the workplace.
